

Advance Deposit Tracker — Process Document

Masters (pre-requisite — must be maintained before any workflow runs)

Supplier Master — complete list of approved suppliers. Source for the supplier dropdown.

Defaulted Supplier List — subset of suppliers flagged as defaulted. Each entry carries the overdue amount. When a supplier on this list is selected, the request cannot be submitted. Finance Team is the only party who can remove a supplier from this list.

Team Member Master — approved email IDs and their assigned role. Only listed emails can access the application. Roles: Merchandiser, Accounts, Analytics.

Vertical / Category Master — approved dropdown values for product vertical/category.

Step 1 — Merchandiser submits a request

1. Merchandiser logs in using their company Gmail ID. Access is validated against the Team Member Master.
2. Landing page shows a dashboard of their own pending requests.
3. Merchandiser opens a new request form and fills in all required fields.
4. On supplier selection, the system checks the Defaulted Supplier List. If the supplier is flagged, a disclaimer appears showing the overdue amount and the form cannot be submitted. The Merchandiser must escalate to the Sunshine Finance Team to resolve the flag before proceeding.
5. If the supplier is not flagged, the Merchandiser submits the request. Status is set to **Pending Payment**.
6. The Accounts Team is notified that a new request is awaiting payment processing.

7. Until the Accounts Team confirms payment, the Merchandiser can withdraw or cancel their own request. Once payment is confirmed, withdrawal is no longer possible.
 8. Merchandiser can navigate to a Reports section to view their past completed requests.
 9. Merchandiser can navigate to the Analytics tab in read-only mode.
-

Step 2 — Accounts Team processes payment

1. Accounts Team member logs in using their company Gmail ID. Access is validated against the Team Member Master.
 2. Landing page shows a dashboard of all requests pending payment confirmation, sorted oldest first.
 3. Accounts Team member opens a pending request and reviews the details submitted by the Merchandiser.
 4. Accounts Team member enters the required payment details.
 5. Once payment status is set to **Payment Processed**, the record is locked. The Merchandiser can no longer edit or cancel the request.
 6. Accounts Team can navigate to a Reports section to view past completed payment records.
 7. Accounts Team can navigate to the Analytics tab in read-only mode.
-

Step 3 — Analytics view

This is a read-only view accessible to both Merchandiser and Accounts Team members. It presents computed metrics from the submission data:

- **ETD (Grace) Overdue Days** — days overdue after the 10-day grace period on the estimated shipment date
- **Payment to Ship Date** — number of days between payment date and actual shipment date
- **Payment to Request Date** — number of days between payment date and original request date

- **Actual ETD Overdue Days** — actual days by which shipment exceeded the ETD
- **Cost of Fund Applicability** — flag indicating whether cost of fund applies to the transaction

Users can filter by Vertical, Customer, Staff member, and date range. No edits are permitted from this view.

Status lifecycle

Status	Set by	Meaning
Pending Payment	System submission on	Awaiting Accounts action
Hold by Merchandiser	Merchandiser	Submission paused
Hold by Accounts	Accounts Team	Payment review pending
Payment Processed	Accounts Team	Record locked, payment confirmed
Canceled by Merchandiser	Merchandiser	Withdrawn before payment

Access control summary

Role	Can submit	Can cancel	Can enter payment	Can view analytics
Merchandiser	Yes	Yes (pre-payment only)	No	Yes (read-only)

Accounts	No	No	Yes	Yes (read-only)
----------	----	----	-----	-----------------
